

REG

RUBBER EXHAUST NOZZLE WITH VISE GRIP

The REG nozzle is a rubber nozzle to be used in vehicle exhaust (VEX) systems.

Recommended for today's trucks, private cars and especially vehicles with twin exhaust pipes. The REG is designed to take in ambient cooling air, thereby reducing the exhaust emission temperature.

The nozzle is composed of moulded, high temperature resistant rubber, and is also equipped with a vise grip to strengthen the connection with the exhaust pipe.

SPECIFICATIONS

■ Physical dimensions and properties	
Material	rubber
Colour	black
Temperature resistance	150°C (300°F) continuously
■ Product combinations	
All exhaust hoses from Ø 75 up to 150 mm (6 in.)	
■ Scope of supply	
Nozzle incl. steel elbow and vise grip	
■ Shipping data	
Harmonized Tariff Code	8421.39.8090
Country of origin	Sweden

FEATURES

CO-outlet for measuring emission values
