

MULTIDUST[®] BANK

Filtration units tailored
to your needs

DO YOU CONTROL DUST AND FUMES?

We do. Controlling fumes and dust in a production plant significantly contributes to a better work environment. Background concentrations of dust and fumes must be kept as low as possible. This can be realized by using the right processes and using quality fume and dust extraction and filtration, which prevents accumulation of fumes in your working environment.

As a specialist in air cleaning technology and expert in filtering fumes from metal-working industry, Plymovent offers various solutions to control fumes and dust, like source extraction, extraction hoods and general ventilation and filtration systems.

THE MULTIDUST® BANK

The MultiDust® Bank is a modular filter system that can be tailored to the requirements of your application today and expanded tomorrow if your business grows. In addition, the efficient and effective performance of each module allows for a compact solution. The range of technical features and the latest filter technology adds up to a filter system that is cost effective to operate and maintain.

MAIN FEATURES

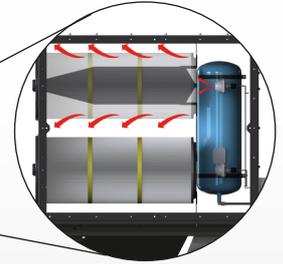

- Modular system, great variety of configurations
- Flexibility to expand as your workload grows
- Can be built on site at any place
- Designed to endure harsh environmental conditions
- Is available with the AllTight™ technology. The innovative double adhesive sealing method has a perfect seal.
- Includes RamAir™ pulse amplifier for superior filter cleaning
- With state of the art control system ensuring low operational costs and high energy efficiency
- Up to 65.000 m³/hr filtration capacity per system
- Optional Plymovent BiCo cartridges: enhanced pulse stability, low pressure drop and long filter life
- Proven concept, thousands of units installed worldwide

Robust and easy to install filter modules designed to create a large range of specific customer configurations up to 65,000 m³/hr

Optional Plymovent BiCo cartridges: enhanced pulse stability, low pressure drop and long filter life

Easy to handle dustbin with a high volume of 80 litres

Inlet and outlet modules can be mounted in a variety of positions for maximum flexibility of ductwork installation.

RamAir™ pulse amplifier provides superior cleaning for longer filter cartridge life and lower pressure loss

“BE IN TOUCH WITH YOUR FILTER” WITH THE CONTROLGO AND CONTROLPRO

ControlGo and ControlPro are Plymovent’s latest filter control systems. With ControlGo Plymovent raises the bar for industrial filter control systems by offering intelligent filter cleaning. ControlGo allows you to connect external devices and future software updates keep your system up to date.

ControlPro has an intuitive touch screen interface giving insight on how the system is performing. The extensive menu enables you to adjust the systems settings to your specific requirements. ControlPro can be connected to a network allowing you to access the system from anywhere.

Main features*

CONTROLGO

CONTROLPRO

Intelligent filter cleaning	✓	✓
Connection for external devices	✓	✓
Software updates	✓	✓
7" touch display		✓
Data logging		✓
Auto start/stop by weekly timer		✓
Network connection		✓

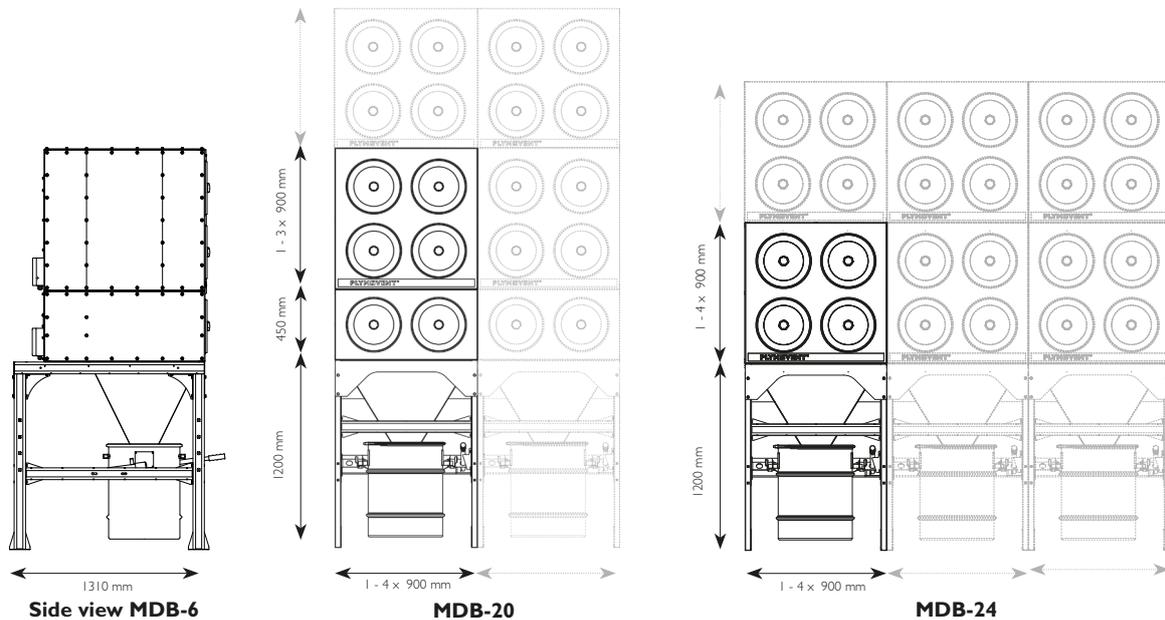

* Ask your sales representative for the full feature list

TECHNICAL SPECIFICATIONS*

Housing material	Electrogalvanized steel with epoxy coating
Filter cartridges	Large selection of filter cartridges available to meet air quality requirements of any metal fabrication process and dry airborne dust applications
Applications	MIG-MAG/GMAW welding, TIG/GTAW welding, FCAW welding, stick/MMAW welding and dry air born dust applications
Suitable for Oil mist	Combined with an OilShield (limestone feeder)
Dimensions	See examples below
Configurations	2 to 64 cartridges

* Ask your sales representative for the product data sheet with all specifications
