

## Designed for versatile environments

From welding shops to fire stations, fabrication bays, and maintenance areas, the AirJet is ready to perform in any industrial or commercial setting. It's a universal solution for improving air quality, whether you're tackling particulates, odors, vapors, or all three.

Available Q4 2025

### AirJet

Premium standalone indoor air cleaner

- Built for Performance
- Intelligent & Flexible Controls
- Advanced 4-Stage Filtration
- Easy Installation

**PLYMOVENT®**  
clean air at work

### We care about the air you breathe

We believe everyone deserves clean air at work. That's why we design, manufacture, and supply products, systems and services all over the world for the extraction and filtration of polluted indoor air. We provide high-quality solutions to welders, metalworkers, firefighters, garage mechanics, and many more workers at risk from a polluted workplace. Our products contribute significantly to a cleaner, safer and healthier work environment.

## AirJet

Premium standalone indoor air cleaner

[Plymovent.com](http://Plymovent.com)

## Built for performance

The AirJet is a freeblowing unit that improves air quality in large spaces without adding noise.

With an impressive 4,400 CFM airflow, it cleans large volumes of air quickly and effectively, making it ideal for use near workstations and in the largest industrial halls.

## The essentials

### Powerful airflow

4,400 CFM for fast air turnover

### High static pressure (max. 4" WG)

Keeps going even with resistance

### Low noise level: max 69 dB(A)

Quiet enough for busy work floors

### Consistent performance

Performs in the largest indoor spaces

### Power options

230V split and 120V single phase

## Intelligent & flexible controls

Built to adapt: Fine-tune airflow and direction to match your layout. Variable speed and flow control are always included.

## Three control packages

### Manual

Simple and reliable, with integrated flow control

### Automated with Remote Control

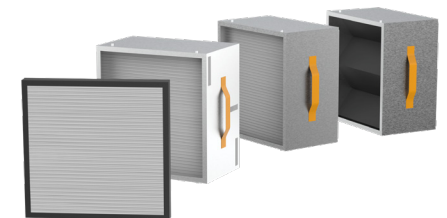

Adapts to your environment

### Activation Package Available Q1 2026

Adds smart features and external system integration

## Advanced 4-Stage Filtration

- **Pre-Filter (MERV 8):**  
Captures larger dust and debris to extend the life of the fine filters.
- **Main Filter (MERV 16):**  
With up to either 160 or 280 ft<sup>2</sup> of surface area, it traps ultra-fine particles like diesel exhaust fumes, welding fumes, smoke, and allergens.
- **Activated Carbon Filter:**  
Loaded with 35 lbs of carbon, it absorbs gases, VOCs, vapors, and odors for truly clean air.
- **Post-Filter (MERV 8):**  
Captures larger dust and this filter safeguards the filter output of the unit.

## Installation made easy

Easy installation and maintenance: Flexible mounting options (imperial/metric) to fit any facility, plus quick, tool-friendly service access.
