

TRUCK EXTRACTION NOZZLE

WHY WE CREATED THE TRUCK EXTRACTION NOZZLE (TEN)

Vehicles with under carriage tailpipes can be difficult to reach due to the EPA 07 and Euro 6 regulations - where the temperatures are high and the quick cool down induction of ambient air to cool the exhaust stream during DPF regeneration. Hence leading to tailpipe shapes which are difficult to connect with standard exhaust nozzles. Therefore, we are pleased to introduce our solution, the Truck Extraction Nozzle (TEN).

As clearly demonstrated in the pictures, we see how modern trucks benefit from the Truck Extraction Nozzle which goes "where no other nozzle has gone before" - safeguarding the health of your maintenance staff. The TEN is an adjustable nozzle that can connect to tailpipes that are hard to reach and/or have an irregular shape. The flexibility of the TEN accommodates an easy, touchless interface between the nozzle and the exhaust pipe. The flexible magnetic hose positioner interface allows the operator to position the hose on any desired location!

HOSE ADAPTER WITH MAGNET ACCEPTS ALL > 150MM / 6" NOZZLES

REMOVABLE MAGNETIC HOSE COUPLING POSITIONER

WATCH THE COMPLETE VIDEO!

FEATURES

- 360° flexibility with the designed ball and socket joint
- Unique and easy locking mechanism with quarter turn locking handle
- Rotating wheels with brakes
- Removable magnetic hose coupling positioner
- Compatible with all Plymovent 6" / 150mm exhaust hoses

TECHNICAL DATA

Product Combinations	Compatible with all Plymovent hoses
Airflow (car)*	Recommended 300 cfm (510 m ³ /h)
Airflow (truck)*	Recommended 750 cfm (1274 m ³ /h)
Outdoor Use Allowed	No
Weight	42 lbs (19 kg)
Standards	EPA 07 (EURO 6) for under carriage tailpipes

Please refer to the TEN Product Data Sheet for complete specifications.
*Airflow and system design will vary according to the vehicle application and engine size.
