

INTERNAL GRABBER

UNIVERSAL EXHAUST EXTRACTION NOZZLE

The Internal Grabber® is used to connect internally to the virtually all tailpipe shapes as well as flush tailpipes. The Internal Grabber is able to hose a variety of hose diameters. It is designed to connect to tailpipes, immediately limiting the danger of exhaust emissions exposure for the user and other personnel. Next to an unmatched flexible connection beak the Internal Grabber includes a soft edged, sliding and pivoting skirt with optimizing docking possibilities while maximizing exhaust extraction. The Internal Grabber comes standard with an automatic shut-off damper as well as a magnetic mounting tripod for easy out of way storage.

APPLICATIONS

The Internal Grabber is intended to be used for the following applications:

- To eliminate hazardous vehicle exhaust emissions with our vehicle exhaust capture and removal systems for the following segments: fire and emergency service stations as well as military facilities.
