

BAYONET QUICK LOCK

TAILPIPE CONNECTOR

Across neighboring communities, fire departments work together to share resources and apparatus when needed. During mutual aid, a fire or EMS truck can use the Plymovent vehicle exhaust system while inside a neighboring station. But what if the vehicle is equipped with the Plymovent **Magnetic Grabber** system and the neighboring station contains the Plymovent **Pneumatic Grabber** system – or another exhaust removal system? In those cases, the Plymovent Bayonet Quick Lock comes to the rescue. When attached to a vehicle's tailpipe adapter, the Bayonet makes the vehicle compatible with the Pneumatic Grabber nozzle or similar exhaust removal system.

APPLICATIONS

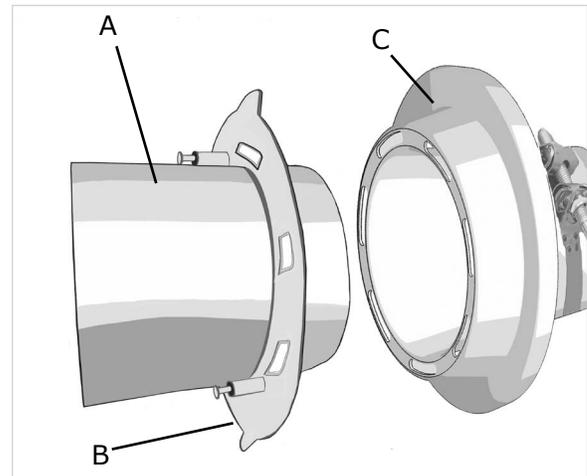

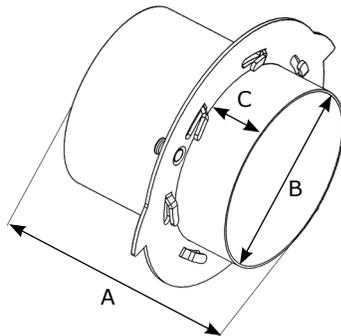

The Bayonet Quick Lock is intended to make vehicles using the Magnetic Grabber system compatible with the Pneumatic Grabber system.

SPECIFICATIONS

Physical dimensions and properties	
Material	stainless steel
Finish	electro polished
Weight	2.2 lbs (1 kg)
Diameter of brim plate	Ø 7.5 in. (190 mm)
Recommended storage	
Plymovent recommends the Bayonet Quick Lock be stored inside the vehicle and then connected as the vehicle enters the neighboring station or bay.	
Order information	
Number/package	1
Remaining specifications	
Diameter	Article no.
5 in. (127 mm)	0000112783

A	5.1 in. (130 mm)
B	Ø 5 in. (127 mm)
C	1.6 in. (40 mm)

CONSTRUCTION:

- A. High-grade stainless steel, electro polished
- B. Brim plate contains two spring-loaded plunger metal pins and bayonet twist lock
- C. Fits into the Plymovent Magnetic Grabber® conical Tailpipe Adapter and similar adapters
